PATRIC PHINEHAS RAJ

Senior Full Stack Engineer | Python | React | TypeScript | Angular

patricphinehas@gmail.com | linkedin.com/in/patricphinehas | Coimbatore, India | Open to hybrid (Coimbatore / Bengaluru)

SUMMARY

Full stack engineer with 6+ years at Bosch Global Software Technologies. I work across the stack: Python on the backend (FastAPI, Django, Flask) and React, TypeScript and Angular on the frontend. Most of my recent work is on a Digital Twin platform for IoT monitoring, where I lead a team of 8 frontend and 2 iOS developers, build the Python APIs and integrations behind it, and handle authentication with OAuth 2.0 and JWT. I also review most of the team's code.

SKILLS

Backend: Python, FastAPI, Django, Flask, REST APIs, system integrations, Node.js (Express)

Security: OAuth 2.0, JWT, Azure AD, role-based access, Backend-for-Frontend (BFF) pattern

Frontend: React, React Router, Redux, Context API, TypeScript, JavaScript (ES6+), Angular (12, 16, 18), RxJS, NgRx, HTML5, CSS3, SCSS

Testing: Jest, Jasmine, Karma

Data and cloud: PostgreSQL, MongoDB, Firebase, Azure (App Service, Functions, Blob Storage), AWS (EC2, S3, Lambda), Docker (basic)

DevOps: Azure DevOps, GitHub, CI/CD pipelines

Tools: Cursor, Claude Code, Coco CLI, Grok Bot, Hermes, n8n, Ollama, Figma

GIS and Maps: ArcGIS Maps SDK for JavaScript, Leaflet, Mapbox, OpenLayers, geofencing, WebSockets

Other: iOS (Swift), Microsoft Teams Bot Framework, Power Platform, Three.js, ECharts, D3.js, Agile/Scrum

EXPERIENCE

Senior Software Engineer, Digital Twin

Bosch Global Software Technologies | Bengaluru, India | Jan 2023 - Present

- Lead a team of 8 frontend and 2 iOS developers on a Digital Twin platform that monitors 180 IoT assets in real time. Dashboards and 3D views are built in React and Angular with TypeScript.
- Built map views with the ArcGIS Maps SDK for JavaScript, Leaflet, Mapbox and OpenLayers: live asset tracking, geofences, and interactive markers that open into infographics or drilldown views. Data loads on demand, with WebSockets for the real-time cases.
- Build and maintain the Python (FastAPI, Flask) services behind the platform, including a BFF layer that combines asset, sensor and enterprise data into the shape each screen needs.
- Set up login and access control using OAuth 2.0 and JWT with Azure AD, with role-based permissions on both the APIs and the UI.
- Wrote Python integrations for a Microsoft Teams bot that sends alerts and handles approvals. Teams now respond about 30% faster.
- Review code and set testing standards (Jest, Jasmine/Karma) across the Python and frontend work. Also mentored 4 UX interns.
- Work with designers to turn Figma designs into working features. Also built an iOS app with offline support for field engineers.
- Use Cursor, Claude Code and n8n in my regular workflow for scaffolding, test writing and automating repetitive tasks.

Full Stack Specialist

Bosch Global Software Technologies | Bengaluru, India | Sep 2022 - Jan 2023

- Built REST APIs in Django and Flask and connected them to Power Apps and Power Automate flows used by internal teams.
- Created shared React and Angular components that cut the time to build new dashboard features by about 30%.
- Secured the APIs with JWT and delivered the UI for 20+ internal users.

Associate Software Engineer

Bosch Global Software Technologies | India | Sep 2020 - Aug 2022

- Wrote backend services in Django and Flask for internal dashboards, pulling data in from several upstream systems.
- Built Angular and React screens with Chart.js and D3.js charts on top of those APIs.
- Shipped 20+ releases in two-week sprints. Brought page load time down 40% using lazy loading and change detection fixes.

Graduate Intern, Software Engineering

Bosch Global Software Technologies | Coimbatore, India | Jul 2019 - Jun 2020

- Built a proof of concept with a Flask backend and an Angular frontend that showed live data feeds and charts. Hired full time after the internship.

EDUCATION

M.E. Information Technology | PSG College of Technology, Coimbatore | 2018 - 2020

B.E. Computer Science and Engineering | Jansons Institute of Technology, Coimbatore | 2013 - 2017

CERTIFICATIONS

- EMC Academic Associate, Data Science and Big Data Analytics
- OpenAI API and Prompt Engineering
